BERG

**PRECISION
MECHANICAL
COMPONENTS**

Dear Valued Customer:

W.M Berg has been a supplier of precision mechanical components for over 35 years. Our customers have come to rely on Berg for our outstanding quality and customer service. Our product serves customers in many industries, including aerospace, semiconductor, medical devices and inspection equipment.

Recently, many of our customers have asked us to supply product that meets the requirements of DFARS 252.225-7014. We also have customers who require that our product be RoHS compliant. At Berg, **we do not believe that a customer should have to wait longer for their order/quote or pay more** to get product that complies with DFARS or RoHS. We view meeting these requirements as good customer service.

We invite you to send us inquiries for your DFARS and/or RoHS requirements. We will do everything we can to meet your needs as soon as possible. If you have any questions, please give us a call at 800-232-2374.

Thank you for your continued support.

Sincerely,
Joanne Marsalisi
